Crop Breeding, Genetics and Genomics (CBGG) is a journal jointly launched by the State Key Laboratory of Hybrid Rice and Hapres. It is dedicated to providing the latest advances in the areas of crop breeding and evolution, genetics, functional genomics, bioinformatics and biotechnology, including cereals, legumes, oil crops, root and tuber crops, horticultural crops, and other cash crops. It aims to promote research communications in the areas of crop science by providing a unified forum for scientists working in agriculture and botany to share their latest findings with a broad audience worldwide.

With the deepening of research collaborations and academic exchanges, it is our great honor to announce that new distinguished scholars have formally joined the *Crop Breeding, Genetics and Genomics* as new members of the journal's editorial board.
